

SUBHRADEEP SAHA

MACHINE LEARNING ENGINEER

rosesaha2k@gmail.com | <https://www.linkedin.com/in/subhradeep-saha-51a3732a7/> | <https://github.com/subhra12-commits> | 7005563799

SUMMARY

Motivated Machine Learning Engineer with hands-on experience in building and deploying ML models, data pipelines, and AI-driven solutions. Proficient in Python, deep learning frameworks, and MLOps tools. Passionate about solving real-world problems through data and intelligent systems.

TECHNICAL SKILLS

Programming: Python, C++, SQL **Machine Learning:** Scikit-learn **Deep Learning:** PyTorch, TensorFlow **MLOps & Deployment:** Docker, MLflow, DVC **Version Control:** Git

PROJECTS

Customer Churn Prediction

- Built an end-to-end ML pipeline to predict customer churn using gradient boosting models, achieving 92% accuracy on test data.
- Deployed the prediction application using Flask and Docker on AWS.

AI Resume Screener

- Developed an NLP-based resume screening tool using BERT for semantic matching between job descriptions and resumes.
- Implemented MLflow for experiment tracking and DVC for data versioning.
- Additional projects available on GitHub.

Permind AI

- Developed an AI-powered interview preparation assistant using RAG, Sentence Transformers, and Gemini AI for semantic retrieval and intelligent response generation.
- Implemented FAISS-based vector search to retrieve relevant interview questions and knowledge from multi-source datasets using semantic similarity.
- Built a modular FastAPI backend and Streamlit frontend with automated data preprocessing, validation, EDA, and retrieval evaluation.
- Additional projects available on GitHub.

EXPERIENCE

ML Engineer Intern – AiLabs | Jun 2025 – Jul 2025

- Worked on training and fine-tuning NLP models for classification tasks.
- Collaborated with data engineers to build scalable data pipelines.
- Automated model evaluation and reporting using MLflow.

AI Engineer Intern – AiLabs | Jun 2026 – Jul 2026

- Designed and developed **Permind AI**, an AI-powered interview preparation assistant using **RAG, Sentence Transformers, FAISS, and Gemini AI** for semantic retrieval and AI-assisted response generation.
- Built the end-to-end **NLP pipeline**, including multi-source dataset preprocessing, cleaning, validation, semantic embeddings, vector indexing, and retrieval evaluation.
- Developed a FastAPI backedend and Streamlit frontend, integrating semantic search with RAG to deliver relevant interview questions and contextual AI-generated answers.
- Conducted EDA and retrieval evaluation to analyze dataset quality and improve the relevance of retrieved interview content.

EDUCATION

B.Tech in Computer Science with specialized in Artificial Intelligence and Machine Learning

The Neotia University | 2027 – 2023

CERTIFICATIONS

Infosys Springboard

Mobile App development, Remote | June 2026

Infosys Springboard

Internet Of Things | 2025

ACHIEVEMENTS

- Published research paper on NLP-based text classification
